Special Issue:

RISK ASSESSMENT ISSUES FOR SENSITIVE HUMAN POPULATIONS

Conference Proceedings, Wright-Patterson AFB, OH (April 25–27, 1995)

Preface ix

Introduction — Summary of the Conference on Risk Assesment Issues for Sensitive Human Populations
J.M. Frazier, D.R. Mattie, W.B. Peirano (USA) 1

Session I. BIOLOGICAL VARIABILITY IN RISK ASSESSMENT FOR HUMAN POPULATIONS

Human interindividual variability in susceptibility to toxic effects: from annoying detail to a central determinant of risk
D. Hattis (USA) 5–14

Kids are different: developmental variability in toxicology
L.J. Graeter, M.E. Mortensen (USA) 15–20

Quantitative cancer assessment for vinyl chloride: indications of early-life sensitivity
V.J. Cogliano, G.F.S. Hiatt, A. Den (USA) 21–28

Efficient tissue repair underlies the resiliency of postnatally developing rats to chlordecone + CCl_4 hepatotoxicity
A. Dalu, H.M. Mehendale (USA) 29–42

Phenotypic variation in xenobiotic metabolism and adverse environmental response: focus on sulfur-dependent detoxification pathways
S.A. McFadden (USA) 43–65

Session II. MULTIPLE CHEMICAL SENSITIVITY: CLINICAL, EXPERIMENTAL, AND THEORETICAL CONSIDERATIONS

Chemical sensitivity: symptom, syndrome or mechanism for disease?
C.S. Miller (USA) 69–86

Sensitization induced by kindling and kindling-related phenomena as a model for Multiple Chemical Sensitivity
J. Rossi III (USA) 87–100

Clinically relevant EEG studies and psychophysiological findings: possible neural mechanisms for multiple chemical sensitivity
I.R. Bell (USA) 101–117

Potential animal model of multiple chemical sensitivity with cholinergic supersensitivity
D.H. Overstreet, C.S. Miller, D.S. Janowsky, R.W. Russell (USA) 119–134

Proposed animal neurosensitization model for multiple chemical sensitivity in studies with formalin
B.A. Sorg, J.R. Willis, T.C. Nowatka, C. Ulibarri, R.E. See, H.H. Westberg (USA) 135–145

Session III. RESPONSES OF SPECIAL HUMAN SUBPOPULATIONS TO TOXICANTS

Adverse health effects of air pollutants in a nonsmoking population
C.A. Pope III (USA) 149–155

Comparison of four human studies of perinatal exposure to methylmercury for use in risk assessment
J.L. Cicmanec (USA) 157–162

Role of nutrition in the survival after hepatotoxic injury
S. Chanda, H.M. Mehendale (USA) 163–178

Session IV. OCCUPATIONAL AND ENVIRONMENTAL EXPOSURE CASE STUDIES

Overview of diisocyanate occupational asthma
J.A. Bernstein (USA) 181–189
Characterization of histamine releasing factors in diisocyanate-induced occupational asthma
Z.L. Lummus, R. Alam, J.A. Bernstein, D.I. Bernstein (USA) 191–206
Development and application of non-invasive biomarkers for carcinogen-DNA adduct analysis in occupationally exposed populations
G. Talaska, J. Cudnik, M. Jaeger, N. Rothman, R. Hayes, V.J. Bhatnagar, S.J. Kayshup (USA, India) 207–212

Possible health risks from low level exposure to beryllium
A.W. Stange, D.E. Hilmas, F.J. Furman (USA) 213–224
Sampling and analysis of airborne resin acids and solvent-soluble material derived from heated colophony (rosin) flux: a method to quantify exposure to sensitizing compounds liberated during electronics soldering
P.A. Smith, P.S. Son, P.M. Callaghan, W.W. Jederberg, K. Kuhlmann, K.R. Still (USA) 225–238
Exposure-response functions in Air Force toxic risk modeling
L.L. Philipson, J.M. Hudson, A.M. See (USA) 239–249

Session V. INCORPORATING SUSCEPTIBILITY INTO RISK ASSESSMENT

Obtaining information about susceptibility from the epidemiological literature
J.A. Grassman (USA) 253–270
Evaluating human variability in chemical risk assessment: hazard identification and dose-response assessment for noncancer oral toxicity of trichloroethylene
H.A. Barton, C.D. Flemming, J.C. Lipscomb (USA) 271–287
Investigation of the impact of pharmacokinetic variability and uncertainty on risks predicted with a pharmacokinetic model for chloroform
B.C. Allen, T.R. Covington, H.J. Clewell (USA) 289–303
Risk assessment policy for evaluating reproductive system toxicants and the impact of responses on sensitive populations
G.B. Briggs (USA) 305–313
Use of physiologically based pharmacokinetic modeling to investigate individual versus population risk
H.J. Clewell III, M.E. Andersen (USA) 315–329
Interindividual variations in susceptibility and sensitivity: linking risk assessment and risk management
R.J. Preston (USA) 331–341

Author Index 343
Subject Index 345–348
Volume Contents 349–350
